

A brisk morning with some wind and rain 0735 – 0800hrs and again 0840 – 0900hrs

Stationed under the River Road overbridge in the vicinity of Te Aroha St 0630 – 00900 hrs.
Find below both counts of bikes traversing Claudelands Bridge.

It did include

- one individual traversing Out (East Bound) who crossed to the other side immediately after the bridge to get to the footpath and onward to River Road, holding up traffic considerably to much tooting of horns.

Presumably these figures will travel in the opposite direction at the end of the day; even so, doubling the figures are considerably short of the 600 per day reported by Council.
